

## **The Heritage Foundation**

Founded in 1973, The Heritage Foundation is a think tank focused on advancing public policy that promotes the conservative interest in areas of limited government, free enterprise, individual freedom, strong national defense, and traditional American values.

Primarily devoted to policy research, The Heritage Foundation uses its findings to inform Congress, congressional staff, the media, executive branch officials, and the academic community. Combining research, communication, and advocacy, Heritage maintains the most up to date and advanced policy contact with policy makers.

The Heritage Foundation's digital archives dating back to 1977 can be accessed at <http://www.heritage.org/research/all-research.aspx?nomobile&highyear=1981&lowyear=1977>.
